

ISO 31050 & Risk Intelligence: An Approach to Emerging Risks

10 June 2026

14.00 - 16.00 (GMT+7)

FREE Limited Seat*

This webinar explores how organizations can strengthen their ability to identify and respond to emerging risks through a risk intelligence approach based on ISO 31050. Participants will learn how adding the dimensions of time horizon and velocity can enhance traditional risk assessment and support more proactive decision-making.

The session will also introduce the risk intelligence cycle and demonstrate its practical application to climate risk—one of today's most significant and evolving challenges—helping organizations better understand its timing, speed, and potential impact.
