

Governing AI in an Uncertain World: Balancing Innovation, Risk & Accountability

16 September 2026

14.00 - 16.00 (GMT+7)

FREE Limited Seat*

Artificial Intelligence is rapidly reshaping business models, customer interaction, operations, and decision-making. However, AI adoption also creates new governance challenges related to accountability, data privacy, ethics, model risk, bias, cyber exposure, third-party dependency, and regulatory expectations.

This webinar explores how organisations can establish practical AI governance that enables innovation while protecting stakeholder trust. Participants will gain insights from global standards and leading practices, such as NIST AI RMF, ISO/IEC 42001, and other standards.

Topics Discussed

**From AI Principles
to Board Level Governance :**
**Setting Accountability,
Risk Appetite and Oversight**

**Thomhert
Siadari**

Lead of Drafting Team,
National AI Roadmap White Paper,
AI Working Group, MoH
Indonesia

Operationalizing Trustworthy AI:
